## PREVALENCE OF, AND DEATHS FROM, TUBERCULOSIS AND OTHER DISEASES

The distribution of notified diseases (other than Tuberculosis) during the year

1970

Disease	Under 1	1-4	5-9	10-14	15-19	20-24	25 and over
Scarlet fever	-	-	-	-	-	-	-
Diphtheria	-	-	-	-	-	-	-
Salmonella typhi	-	-	-	-	-	-	-

## SANITARY CIRCUMSTANCES OF THE AREA

<u>Water</u>	<u>Bacteriological</u>		<u>Chemical</u>	
	<u>By U.D.</u>	<u>By Water Authority</u>	<u>By U.D.</u>	<u>By Water Authority</u>
Number of Samples taken for Analysis:-				
(a) from wells	-	-	-	-
(b) from piped supply	-	52	-	52
(c) at source of public supply	-	-	-	-

### Results of Samples taken:-

(a) from wells - unsatisfactory	-	-	-	-
satisfactory	-	-	-	-
(b) from piped supply - unsatisfactory	-	-	-	-
satisfactory	-	52	-	52

All the public supply sources are outside the Urban District.

The public supply was unrestricted throughout the year.

Leicester Corporation is responsible for the water supply.

Practically 100% of the houses and of the population of the Urban District are supplied. In a few cases the water is not laid into the houses. These are mainly in an area scheduled for re-development. There are no public stand-pipes but in five cases taps are shared.

Two good houses with satisfactory piped private supplies are the only ones not on the public supply.

The fluoride content of the water is less than 0.2 p.p.m. and the Council decided in 1963 that no objection be raised to any proposal for the addition of fluoride to the water supply.

### Sewerage and Sewage Disposal

No extensions have been made to the sewers. New development was restricted, due to work at the sewage disposal works. This work continued during the year, new units being brought into commission as they were completed, the largest change-over being mid-year when inlet works, settlement tanks and new filters were brought into use. Apart from minor completion items, the work was completed on schedule in December.

The operation of the existing overloaded works whilst enlargement took place caused many problems, but these were overcome and the standard of the effluent rose almost immediately, the new works soon "settling down".

At the end of the year, eleven houses were not connected to the main system but these are in isolated areas, including four farmhouses.

The sewage from the villages of Barleythorpe and Eggleton within the Oakham Rural District is, by arrangement, also dealt with at the works of the Oakham Urban District Council.

### Closet Accommodation

All the sanitary accommodation in the built-up area of the Urban District consists of water closets and there is, therefore, no nightsoil collection.

### Public Cleansing

All the premises in Oakham have movable dustbins and the Council operates an 18/22 cu. yd. (compressing type) refuse collecting vehicle manned by a driver and five men. A seven day cycle of collections is maintained from all the houses and from the shops, with some shops receiving two collections per week.

Refuse disposal is by controlled tipping in a disused ironstone quarry six miles from the town between Wing and Morcott. During the year arrangements were made for use of the tip for disposal of refuse from part of the Ketton Rural District.

The Council operates a free collection service for large and bulky articles such as furniture, as part of its function under the Civic Amenities Act.

# SANITARY CONDITIONS OF THE AREA

Water		Bacteriological		Chemical	
Number of samples taken for analysis:-		By U.D.		By U.D.	
		Authority		Authority	
(a)	from wells	-	-	-	-
(b)	from piped supply	-	-	-	-
(c)	at source of public supply	-	-	-	-
Results of samples taken:-					
(a)	from wells - unsatisfactory	-	-	-	-
(b)	from piped supply - unsatisfactory	-	-	-	-

All the public supply sources are outside the Urban District.

The public supply was interrupted throughout the year.

Lancaster Corporation is responsible for the water supply.

Practically 100% of the houses and all the population of the Urban District are supplied. In a few cases the water is not laid into the houses. There are mainly in an area reserved for re-development. There are no public stand-pipes but in five cases taps are shared.

Two good houses with satisfactory piped private supplies are the only ones not on the public supply.

The chloride content of the water is less than 0.5 p.p.m. and the Council decided in 1953 that no objection be raised to any proposal for the addition of fluoride to the water supply.

## Sewerage and Sewage Disposal

No extensions have been made to the sewer. The development was restricted, due to work at the sewage disposal works. This work continued during the year, and with being brought into commission as they were completed. The largest change-over being 18-inches when inlet works, settlement tanks and new filters were brought into use. Apart from minor completion items, the work was completed on schedule in December.

The operation of the existing overloaded works which enlargement took place caused many problems, but these were overcome and the standard of the effluent rose almost immediately, the new works soon "settling down".

At the end of the year, eleven houses were not connected to the main system but these are in isolated areas, including four farmhouses.

The average flow the villages of Burythorpe and Blythburgh within the Urban District is, by arrangement, also dealt with at the works of the Urban District Council.

## Closet Accommodation

All the sanitary accommodation in the built-up area of the Urban District consists of water closets and there is, therefore, no nightsoil collection.

## Public Cleansing

All the premises in Gillingham have public dustbins and the Council operates an 18/22 cc. van (compressor type) refuse collecting vehicle manned by a driver and five men. A seven day cycle of collection is maintained from all the houses and four the shops, with some shops receiving two collections per week.

Refuse disposal is by controlled tipping in a licensed limestone quarry six miles from the town between Wray and Horwast. During the year arrangements were made for use of the tip for disposal of refuse from part of the Urban District.

The Council operates a free collection service for large and bulky articles such as furniture, as part of the service under the Litter Act.

## Smoke

There are no industrial chimneys within the district. No complaints of smoke nuisance arose.

## Common Lodging Houses

There are no Common Lodging Houses in the district.

## SANITARY INSPECTION OF THE AREA

The particulars given under this heading are for all purposes including particulars given elsewhere in this Report.

Total number of complaints received 75 (including 60 of rats and mice)

Total number of defects or nuisances  
discovered arising out of complaints 83 ( " " " " " " )

This does not include oral complaints which are usually dealt with immediately.

<u>Nature of Inspection</u>	<u>No. of Inspections and Re-visits</u>
Dwelling houses (all purposes)	420
Tents, Vans, etc.	2
Food premises	55
Dairies	2
Offensive trades	-
Animal keeping	2
Factories, etc.	39
Shops and offices	27
Other premises	20

The Offices, Shops and Railway Premises Act is resulting in much improvement to sanitary provisions in those types of premises.

## N O T I C E S

<u>Preliminary</u>	<u>Housing</u>	<u>Other</u>
Outstanding on 1st January, 1970	3	1
Issued during the year	12	4
Complied with during year	11	5
Outstanding 31st December, 1970.	4	-
<u>Statutory</u>		
Outstanding on 1st January, 1970.	2*	-
Issued during the year	-	-
Complied with during year	-	-
Outstanding 31st December, 1970.	2*	-

\*These outstanding cases relate to Demolition Orders where action is not complete, but the premises concerned were not occupied at the end of the year.

## Defects or Nuisances

Most of the work is done by letter, interview or telephone, and few formal notices, either preliminary or statutory, are used.

There are no industrial chimneys within the district. No complaints of smoke nuisance arose.

### Common Lodging Houses

There are no Common Lodging Houses in the district.

### SAFETY INSPECTION OF THE AREA

The particulars given under this heading are for all purposes including particulars given elsewhere in this Report.

Total number of complaints received 75 (including 60 of water and noise)  
 Total number of defects or nuisances discovered relating out of complaints 65  
 This does not include oral complaints which are usually dealt with immediately.

<u>Nature of Inspection</u>	<u>No. of Inspections and Responses</u>
Dwelling houses (all purposes)	450
Tents, vans, etc.	2
Food premises	20
Public houses	2
Offensive trades	1
Animal keeping	2
Factories, etc.	20
Shops and offices	20
Other premises	20

The Office, Shops and Public Houses Act is remaining in force in its present form. The Office, Shops and Public Houses Act is remaining in force in its present form.

### NOTES

<u>Particulars</u>	<u>Number</u>	<u>Other</u>
Outstanding on 1st January, 1950	2	1
Issued during the year	10	4
Completed with during year	11	2
Outstanding 31st December, 1950.	4	-
Outstanding on 1st January, 1950.	2	-
Issued during the year	-	-
Completed with during year	-	-
Outstanding 31st December, 1950.	2	-

\*These outstanding cases relate to Demolition Orders whose action is not complete, but the premises concerned were not occupied at the end of the year.

### Defects or Nuisances

Most of the work is done by letter, interview or telephone, and few formal notices, either preliminary or statutory, are sent.

## CONTROL OF RATS

The Council has a contract with Ratsouris Limited for rat control. All complaints were promptly dealt with and at the end of the year there was little evidence of rats in the town.

## SWIMMING POOLS AND POOLS OPEN TO THE PUBLIC

An open-air swimming bath owned by Oakham School Trustees is hired by the Council during the summer holidays and opened to public use, the Council providing attendants etc. The bath has a pressure filter and chlorinator which works most of the time while the bath is in public use.

Twelve inspections were made during the season.

A modern indoor pool at the Vale of Catmose Village College is made available for use by various organisations during school terms and out of school hours.

## INSPECTION AND SUPERVISION OF FOOD

### Milk Supply

At the end of the year there were three distributors and milk vending machine and three premises registered. Seven inspections of premises and vehicles were made.

No action was found necessary under Regulation 20 - Milk and Dairies (General) Regulations, 1959.

### Ice-Cream

No ice-cream is now made in Oakham, but eighteen premises are registered for its sale.

### Meat Shops, Meat Stores, etc.

Number of inspections .. .. . 12  
There is no slaughterhouse in the Urban District

### Carcases and Offal Inspection and Condemned in Whole or in Part

Whole carcases condemned - None  
Carcases of which some part  
or organ was condemned - None

## FOOD HYGIENE (GENERAL) REGULATIONS, 1960

Premises subject to the Regulations are as follows :-

	<u>No.</u>	<u>Complying with</u> <u>Reg. 16</u>	<u>No. to which</u> <u>Reg. 19 applies</u>	<u>Complying with</u> <u>Reg. 19</u>
Butchers	6	6	6	6
Fishmongers	1	1	1	1
Grocers	11	11	11	11
Bread and Confect.	4	4	2	2
Hotels and Licensed Premises	12	12	12	12
Works Canteens	2	2	2	2
School kitchens	5	5	5	5
Restaurants	3	3	3	3
Dairy Shop, etc.	1	1	1	1
Greengrocers	4	4	-	-

Seven contraventions were found and were remedied.

There is a busy street market on Wednesdays and Saturdays. Some of the stalls sell vegetables, fruit and other foods. It has rarely been found necessary to draw attention to breaches of the Regulations and the stall holders are generally ready to comply.

# Introduction

The purpose of this study is to investigate the effects of various factors on the growth and development of the human body. The study is designed to provide a comprehensive overview of the physical and physiological changes that occur during the human life cycle.

## 1.1. Objectives of the Study

The primary objective of this study is to determine the relationship between age and body mass index (BMI). Secondary objectives include examining the influence of diet, exercise, and genetics on BMI.

## 1.2. Scope of the Study

The study will focus on the adult population, specifically individuals aged 18 to 65. The data will be collected from a cross-sectional sample of participants.

## 1.3. Methodology

The study will employ a quantitative research design. Data will be collected through a series of standardized measurements, including height, weight, and body composition analysis.

The data will be analyzed using statistical methods, including regression analysis, to identify significant correlations and trends.

The results of the study will be presented in a series of tables and graphs, providing a clear and concise summary of the findings.

The study is expected to contribute to the understanding of human growth and development, and to provide valuable insights into the factors that influence body composition.

The study is being conducted in a controlled environment, ensuring the accuracy and reliability of the data.

The study is being conducted in a controlled environment, ensuring the accuracy and reliability of the data.

The study is being conducted in a controlled environment, ensuring the accuracy and reliability of the data.

The study is being conducted in a controlled environment, ensuring the accuracy and reliability of the data.

The study is being conducted in a controlled environment, ensuring the accuracy and reliability of the data.

Premises Registered Under Food and Drugs Act, 1955 Section 16 for

Preparation of Sausages, Potted Meats and Meat Pies - 6

Preparation and sale of Fish and Chips - 1

Disposal of Condemned Food

The following foods were voluntarily surrendered as unfit :-

Cooked meat and meat products	-
Canned meats	16 lbs.
Other canned foods	-
Fish (fresh)	-
Fruit and Vegetables (fresh)	28 lbs.
Other foods	27 lbs.
Frozen foods due to cabinet breakdown	9cwt. 61 lbs.

HOUSING

Number of dwelling houses in respect of which  
Demolition Orders were made :- Nil

Closing Orders made :- -

Number of dwelling houses demolished in  
pursuance of Demolition or Clearance Orders :- Nil

Demolished without necessity of Demolition Order :- Nil

Occupied houses with operative Demolition or  
Closing Orders :- -

Number of dwelling houses closed voluntarily by  
owners following service of informal notice. 2

During the year 41 applicants were rehoused.

At the 31st December, the Council owned 583 houses and flats, 10 temporary bungalows and 24 old houses in the Westgate area of the town. Included in this latter figure are 14 which are unoccupied and are eventually to be demolished for redevelopment.

All the Council's pre-war houses, 95 in number, have hot water systems and washbasins, some have internal W.Cs.

Twelve old persons flats in the Finkey Street/Dean Street/Northgate area, together with a new street named Barlow Road were completed. The flats were linked by a communication system with six existing flats in Dean Street and eight existing flats in Finkey Street and a Warden was appointed for welfare purposes.

## HOUSING

In various parts of the town, improvement grants have been made. Eleven Standard Grants were approved in 1970, and of these, three were completed within the year, together with three which had received approval in 1969. These six improved properties resulted in four baths, five washbasins, six hot water systems, five internal W.Cs., one foodstore and two sinks being provided.

Two Discretionary Grants were approved and work was in progress at the end of the year.

The following table shows new house completions in the last ten years:-

Year	Houses completed other than by the Council	Council Houses	Total
1961	15	21	36
1962	17	63	80
1963	38	8	46
1964	74	1	75
1965	93	6	99
1966	114	22	136
1967	152	77	229
1968	146	-	146
1969	44	-	44
1970	41	12	53
TOTAL	734	210	944

# Table 1

Table 1 shows the results of the experiment. The data is presented in a table with 4 columns: Time, Distance, Speed, and Acceleration. The first column represents time in seconds, ranging from 0 to 10. The second column represents distance in meters, ranging from 0 to 100. The third column represents speed in meters per second, ranging from 0 to 10. The fourth column represents acceleration in meters per second squared, ranging from 0 to 10. The data shows that the speed increases linearly with time, and the acceleration is constant.
